Linear Fixture L25

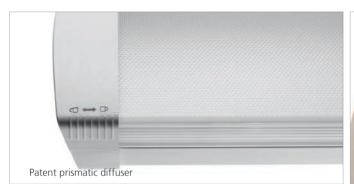

ERVAN linear luminaire L25 is a flexible and slim luminaire with IP44 for multiple indoor application such as parking garages, schools, offices, culverts, laundry rooms, kitchens and industrial buildings. It is suitable for surface mounted or wall mounted, rails bracket mounting, horizontal wires and wire suspension. Thanks to the fastener design of end cap, we can save 80% labor cost of installation.

Notes: Above lumens based on 4000K, Ra 80. All values in +25°C ambient temperature, luminous flux tolerance +-5%, output power tolerance +-5%.

Structure Data

Wiring: 5 wires through
Operation Temp: -20~40 °C

Material: White coating metal+PMMA prismatic diffuser Installation: Surface mounted; Cable wire; Wire suspension;

Wall mounted

Protection: IP44/IK07

Terminal: 5x2.5mm² push-in terminal

Connection: One cable entry at the endcap and two top entries at the back of the luminaire

Application

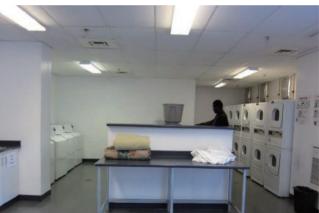

Prismatic diffuser

A wide beam angle with prismatic diffuser directs the light into the width of the room and is well suited for open layouts. Wide beam light distribution creates a uniform illumination with a very comfortable contact with the eyes at very low glare.

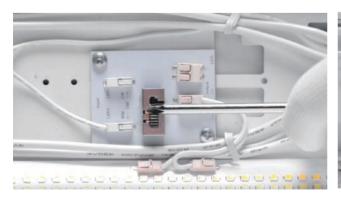

CCT&Power adjustable

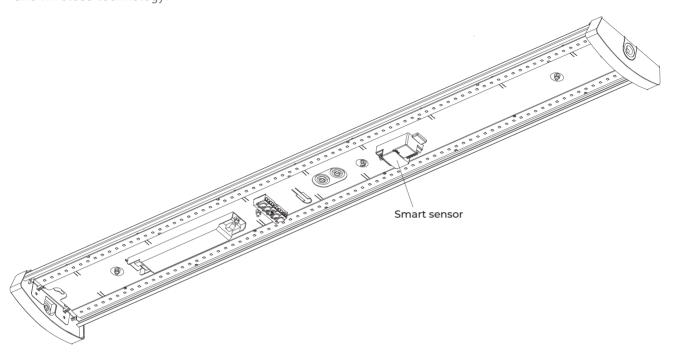

CCT&Power adjustable function available on request makes the luminaire much more flexible to meet the needs for multiple application and minimizing inventory cost.

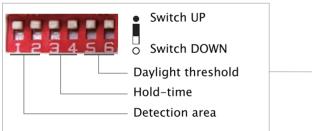

Smart solution

For a lot of application such as parking garages, classrooms, offices, culverts, laundry rooms, kitchens and industrial buildings, it's necessary to save the energy when there is absence of human to minimize the cost. ERVAN could perfectly offer different intelligent solutions according to the application with smart sensors and wireless technology.

Detection area

In this area, movement will be detected and able to trigger the sensor. 100% detection area is also known as the strong sensitivity.

Hold-time

The period of light keeping 100% brightness after moving objects leave the detection area.

Daylight threshold

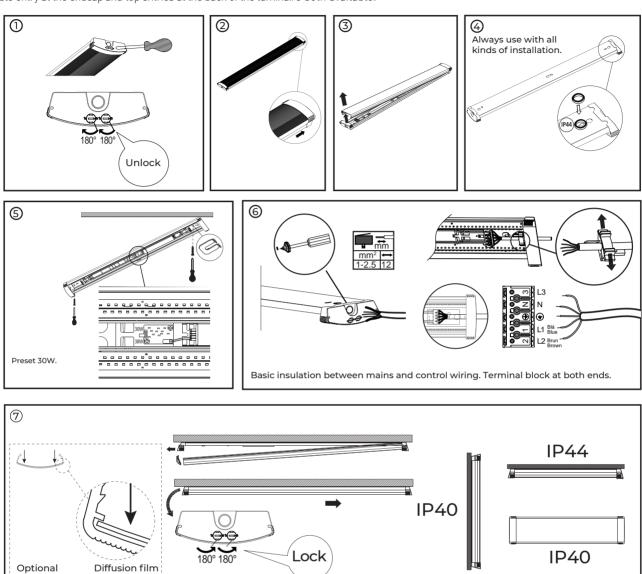

Definition of the ambient brightness; only when the ambient brightness is lower than the preset specific lux amount, the sensor will work; when it's preset as "disable", the sensor works everytime it detects motion regardless the ambient brightness.

Operation and connection

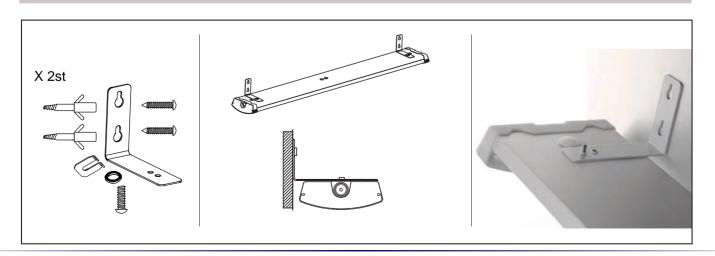

Openable linear fixture where the power cable is inserted in the 5 pole push-in terminal block via end plate.

5-pin terminals at each end facilitate installation when any existing cabling is to be used.

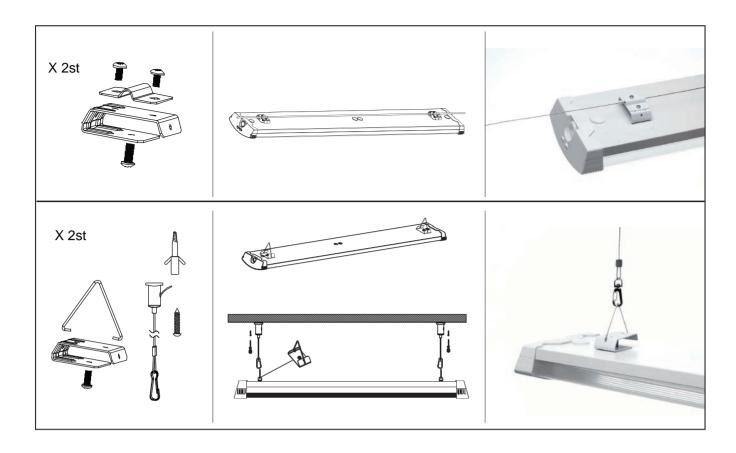

Cable entry at the endcap and top entries at the back of the luminaire both available.
